Hi Adrienne - I just got off the phone with Maria Gillette w/ DTSC. She said that Brian Johnson with DTSC would have the lead data and that it should be something relatively easy to pass along. I'll see what I can find. When do we need it?

See Deldi's question below? Would we be able get any of this type of info? I'm not sure!?

Kathleen, just reviewed the draft paper for Boxer which mentions Exide. In light of the

article below, do we want to mention the most recent findings of levels of lead in soil? I know we wouldn't want to rely on a newspaper article but perhaps our children's health office has more info?
